

# Cables for Industrial applications

Thanks to our many years of R&D and experience in technological developments, Velda Cable Technics has grown into a loyal partner in the assembly of cables for diverse industrial applications.

Each project within the industrial automation is regarded as a challenge to offer our clients the appropriate solution. Existing methods can be simplified by using a custom cable.

We produce cables for the most diverse industrial applications such as systems for manual operation and release, stopping systems, blocking systems, guy systems and push-pull applications...Innovation, quality, flexibility and just-in-time delivery make the collaboration with Velda Cable Technics lead to a successful project.

Quality cables since 1935

# Cables for Industrial applications

## Why opt for Velda Cable Technics?

As a European-based company with a high-performance unit in Asia, we focus on big-volume cable production and assembly following the European certification systems.

Our logistic activities are coordinated and centralized in Europe. The smaller series are produced in our Belgian production unit. This combination guarantees flexible stock conditions and just-in-time deliveries at sharp prices.

In short, Velda combines flexibility and sharp prices with European top quality.

## Custom made goods

We control and supervise the entire production process. We can produce almost any kind of cable, suspension, etc. on demand. Contact our commercial department to inquire about your specific needs.
